- Technical writing
- Copyediting
- Project management
- Interviewing & hiring

EDUCATION & TRAINING

BSc. Computer Science,
University of Reading, UK

[Mastering React](#)

[The React Bootcamp](#)

PERSONAL SUMMARY

I'm a highly motivated and creative web developer and author with over 25 years' experience in the industry. I specialise in front-end and full-stack development. I have a very keen eye for detail and I am passionate about producing high-quality code, as well as delivering a stellar user experience.

PROFESSIONAL EXPERIENCE

Full-Stack Developer / Senior Full-Stack Developer Brighter Futures Group / TutorTree Pty Ltd • April 2020–present

Working in a small team as the main developer, I revamped and launched the API and front end for app.tutortree.com.au, a marketplace and scheduling app for school tutors. Since launch, I have continued to focus on improving code quality as well as implementing new features.

The site is mobile-responsive and uses an Express/Sequelize/PostgreSQL API coupled with a React/Sass front end.

I also designed and built the WordPress marketing website for the app, at www.tutortree.com.au.

Key Responsibilities

- Refactoring, debugging and enhancing the existing codebase
- Creating coding standards, procedures and documentation
- Setting up and configuring Firebase, AWS S3 and Heroku hosting
- Technical interviewing for a junior developer role
- Mentoring the junior developer and performing code reviews

Achievements

- Implemented React hooks and functional components to modernise the front-end code
- Developed a complex search weighting algorithm using a PostgreSQL stored function
- Dramatically improved the quality and maintainability of the code
- Took the project forward from early development through to launch and ongoing maintenance
- Added automated unit and integration testing for the API using Jest and SuperTest, and unit testing for the front end with Jest and React Testing Library

PROFESSIONAL EXPERIENCE (continued)

Expert WordPress Developer

Codeable ApS • May 2020–present

As a certified freelance [Codeable Expert Developer](#), I help worldwide clients achieve their business goals with the WordPress platform.

Key Responsibilities

- Engaging new clients and discussing their project requirements
- Accurately estimating project scope and cost
- Rapidly developing cost-effective solutions
- Building custom WordPress plugins and themes using PHP, MySQL, jQuery and React, as well as integrating existing plugins and themes
- Troubleshooting website issues and optimising site performance

Achievements

- A consistent 5-star rating from over 80 projects and 20 clients
- Very positive written and oral feedback from clients
- Built ongoing working relationships with several customers
- 76% of estimates have converted to sales

Owner and Web Developer

Elated Communications • 1997–present

I have built and maintained a variety of websites, using both my custom CMS and WordPress, for many SME clients, as well as grown my own web design/development tutorials blog at www.elated.com.

Key Responsibilities

- Specifying and delivering websites from start to finish
- Managing client projects and client expectations
- Communicating effectively with clients over email and phone as well as face to face
- Working effectively to deadlines, both external and internal
- Writing technical articles that explain complex topics in an easy-to-understand way

Achievements

- Serviced dozens of clients and received excellent customer feedback
- Written 3 successful technical books: 2 published by Wiley, 1 self-published
- Created a successful web development blog with over 15,000 daily visitors at its peak
